

Adolescent and Young Adult Oncology: PI3K, Precision and Palliative Care

Thurs 31st October - Fri 1st November 2019.
Australian National Maritime Museum, Darling Harbour, Sydney

KCA warmly invites scientists and clinicians, and early career researchers, working in paediatric and AYA cancer to take advantage of this exciting two-day event.

From biochemical pathways to psychosocial research, this comprehensive AYA conference on Adolescent and Young Adult Oncology is one not to miss.

- **Dr Katie Janeway from Boston's Dana-Fabar Cancer Institute will take us through the PI3K/mTOR and cdk4/6 cancer pathways and their relevance in AYA sarcomas.**
- **Associate Professor Abby Rosenberg of Seattle Children's Hospital will address the psychosocial aspects of AYA cancer, including palliative care approaches.**

Other speakers include interstate and local experts in the biology of, and drug trials in, CDK4/6 and PI3K; AYA psycho-oncology; and successful grant writing. KCA early career researchers will also be showcasing their work with poster abstracts and short oral presentations. This symposium is a must for clinicians and researchers working with adolescents and young adults.

Places will be limited – please reply to admin@kca.org.au to receive a notification when registrations open in July. Registration is FREE to all conducting research in this field.
